

Plausibility scanning program for
steering wheels Plant 31 (Russia)

Operator should type in username RUSSIA1 (program is installed only for this user) and password (same RUSSIA1) and press Enter.

Operator should choose and type in “4”, then press Enter.

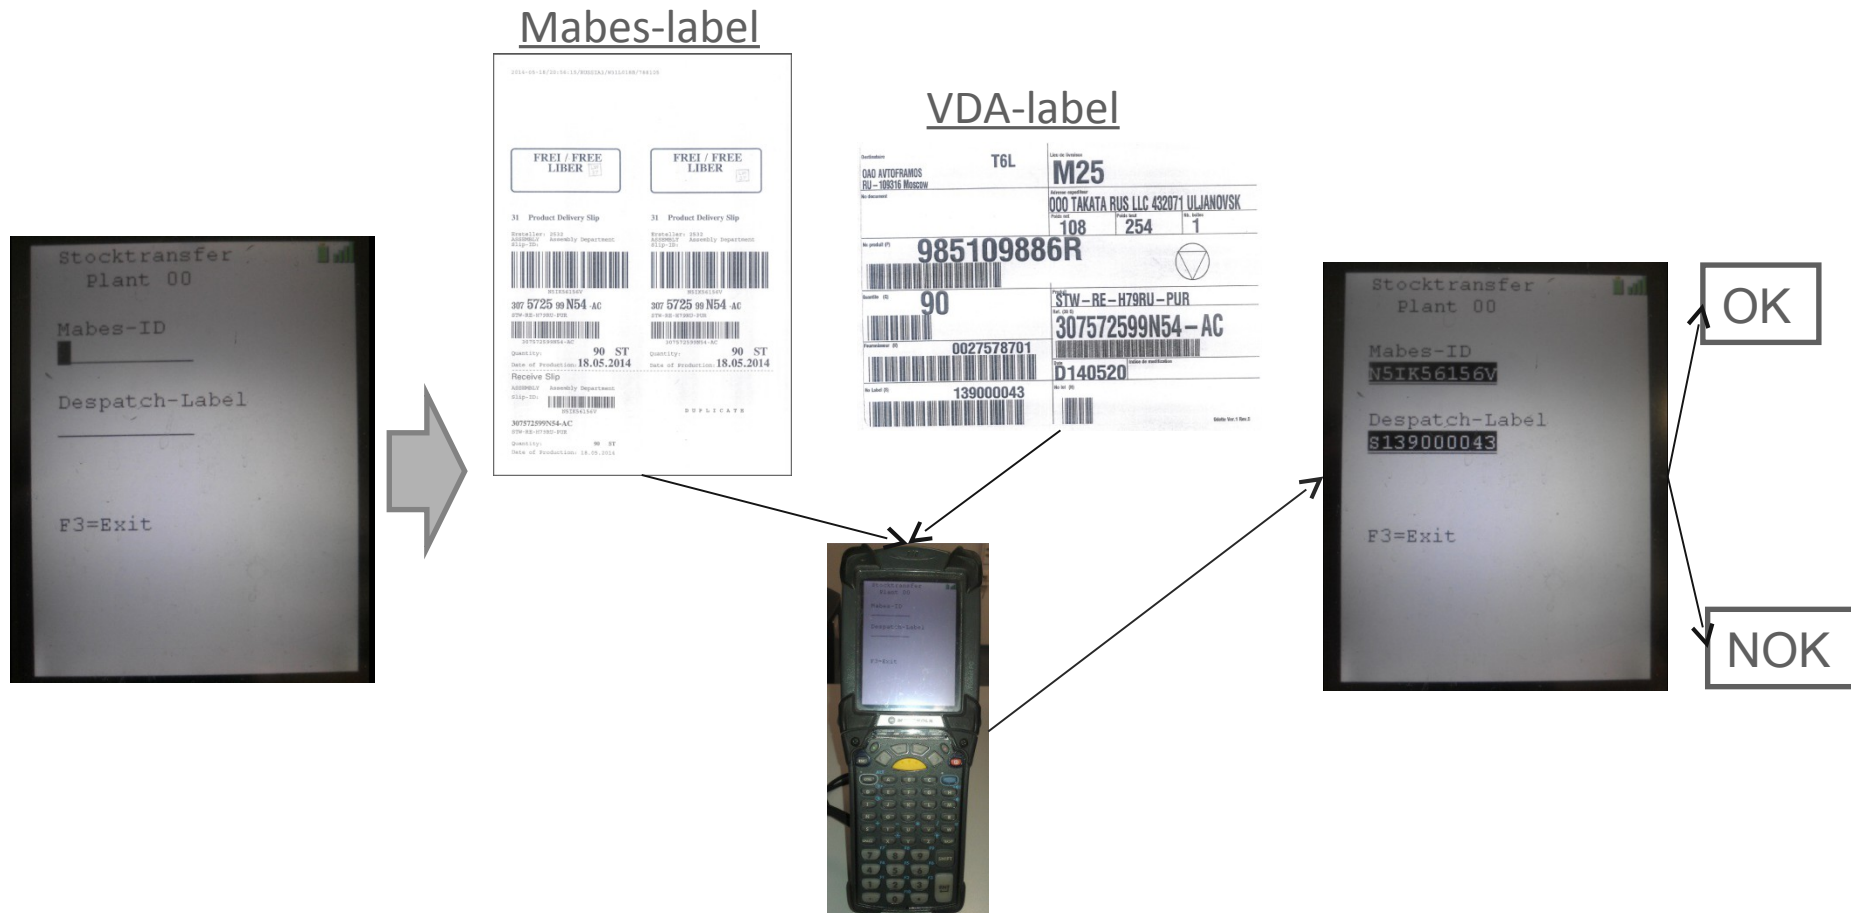

3. Input stage – Program interface

Click on the images to zoom them and view the comments

4

Program displays the field for Mables-ID (Mables-ID) and for VDA-label number (Despatch-Label):

3. Input stage – OK

Click on the images to zoom them and view the comments

5

If labels are matching, mobile scanner turns on green light and does V31 transfer from 31OUT (outgoing warehouse) to VL31 (dispatching area).

Correct labels

Green light

OK

V31 transfer from 31OUT (outgoing warehouse) to VL31 (dispatching area)

3. Input stage – NOT OK

Click on the images to zoom them and view the comments

6

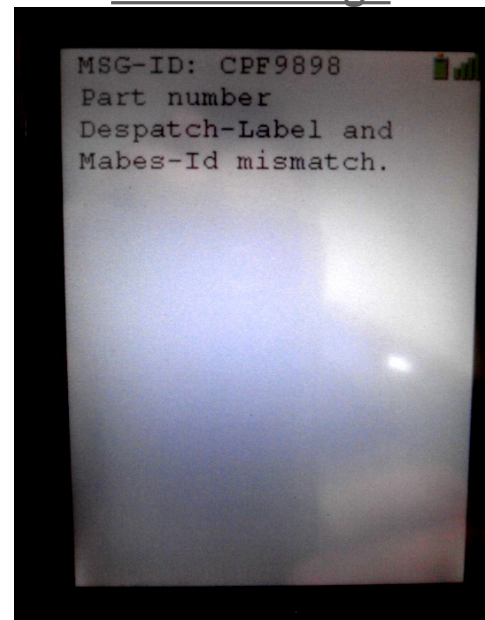

If labels are NOT matching, mobile scanner shows error message:

Wrong labels

NOK

Error message

NO TRANSFERS

Press Enter to return

4. Steering wheels customer labels

7

- SW Plausibility program is working only with VDA labels (in green),
- Customer labels from customer portals (in red) have no connection to FORS -> program doesn't work with them

VDA-label
